IN THE PRESS

Inishowen delivers the Greatest Show on Earth

Beyond Light Therapy event a huge success

Adapted from an advertorial in the Inishowen Independent, 22 October 2024, page 15.

The huge crowd give a standing ovation.

The sun is shining as we embark on another interview about what is happening in Inishowen.

Speaking with the Beyond Light Therapy team in Lisfannon, Buncrana, Inishowen, after their very successful event at The Inishowen Gateway Hotel on September 22nd, Mohneesh, Josephine and Sadie share what transpired in the heart of Inishowen.

Being held at the time of the Autumn Equinox, the Harvest Moon and the Eclipse, this special trilogy of vibrations marks decided change, lasting six months.

The feeling of community spirit and support, very much alive at the event, is still fresh in their minds. The event was international and, to quote many of the attendees, “a world class event”, “Indeed the Greatest Show on Earth”.

Quoting the team: We want to thank the local community for showing up, for their interest and support. We thank our sponsors for giving so freely of their time and effort to make this event positively remarkable.

Our sponsors are all very well established and family run businesses, dedicated to serving the wider community here in Buncrana and Inishowen, and include The Inishowen Gateway Hotel, The Lake of Shadows Hotel, Fireaway, The Black Roast Café, Sherpa, Food For Thought, Sign Right and Tank & Skinny’s.

We know the local community already benefit from the expansion of the forty-eight-unit EESystem technology, which is the 1st in the world outside the USA, and we at Beyond Light Therapy look forward to welcoming all to enjoy the many benefits that are available here in Lisfannon and will be for many years to come.

Testimonials: Many testimonials paramount to the occasion were given on the day from the joyful networking crowd, as well as those shared from the stage. Testimonials of transformations in health, of dis-ease being brought to ease under the influence of scalar energy. Amazing information shared by individuals who have accessed the EESystem technology, knowing that this technology is entirely the "Next Level" in health.

Sadie Grant
Effective Health Solutions Inishowen

Our local speaker, Sadie Grant, "Effective Health Solutions Inishowen", has recently joined the team at Beyond Light Therapy. Sadie spoke about cell detoxification and how to optimise the cell to receive the electrical charge, and the light offered by the EESystem Technology. Sadie brought to the attention of the attendees the many inspirations in health down through the ages, from herbalism and homeopathy, through the age of allopathic medicine and now into the technological age. Each age of human existence brought what it could to ease the sufferings of the people, and the technological age is no different, with modern practices including bio-resonance, frequency microcurrent and now the EESystem Technology. She said we are truly blessed to have Beyond Light Therapy here in Inishowen, raising the vibrations for all of us and helping us move towards our potential on every level.

Beyond Light Therapy will soon offer a funnelling system to create consultations for those who need advice prior to booking the 48 unit Energy Enhancement System sessions, or for those who wish to avail of bespoke post-session support.

Dr Sandra Rose Michael
Inventor of the Energy Enhancement Technology

Dr. Sandra Rose Michael, the inventor of the Energy Enhancement Technology, took to the stage. Dr Sandra Rose Michael is featured globally in a variety of books, magazines, newspapers and journal articles, including a peer reviewed University of Hawaii study on seizure disorder in Autism. She talked about how anything and everything improves, and how the EESystem Technology, Scalar Energy and Photons repair DNA. She also shared with the audience the science and ongoing support for her work from medical people worldwide, who see evidence of cellular change and exciting positive effects published in peer reviewed journals, and shared that she has been invited to speak worldwide explaining functional health. She closed with her famous line, "The Power that Made the Body Heals the Body".

Nicolya Christi
Author, writer and spiritual teacher

Nicolya Christi is a published author of *Love, God and Everything*, writer and spiritual teacher, a speaker who transcends higher consciousness and was truly beautiful in the way she led a meditation, using her inspirational work and consciously co-created to raise all our vibrational energy, perfectly, for our benefit moving forward from a time marking great change. Nicolya spoke of the Autumn Equinox, the Eclipse, the Full Moon and the divine timing of this event.

Sandy Ingham
Medium and live portrait artist, with Leo

Our final guest of the event was Sandy Ingham and her wonderful Leo (Leonardo Da Vinci). Sandy and Leo have been long-time pals, communicating since Sandy was a very young girl. He has been there her whole life and in recent years he works on his artistic genius through mediumship and the ability to create live portraits. Sandy's ability involves the infamous Leo's masterful energy, and through him, as she said, allows the flow of energy to create masterpieces.

The energy interaction from the audience will find someone who can communicate to their loved one, "Gone Home". An image created by Leo is in the likeness of the loved one so that the person can fully relate, ask questions, and receive assurances. Advice is delivered and reassurance that they are always with them, as energy never dies, is the peace that Leo and Mrs Sandy bring to the live stage.

Our guests may wonder why we included this phenomenon in our very special event. We answer that Leo guided Sandy to Beyond Light Therapy here in Inishowen as the first ever 48-unit Energy Enhancement System outside of the U.S. Sandy was our first ever guest through our doors, and even more importantly Sandy has had extraordinary results from her stay in Lisfannon, which is shared on our YouTube channel for everyone to see.

Even more special was that the website hadn't even gone live and was only in the very immediate testing stage, and neither was the booking calendar attached, proving Leo's advice is never wrong.

Sandy's website is included here, so you may book online a personal reading for yourself, for your peace and healing may continue, reassured that the energy where we come from is the same energy where we go home.

We extend a huge thank you to Sandy Ingham and her Leo for their continued support of us here at Beyond Light Therapy and look forward to their next visit to us here in Inishowen.

Mohneesh Jindal
Co-owner, Beyond Light Therapy

Fear An Ti for the day was Co-Owner of the first ever 48-unit EESystem in the world outside the USA, Mohneesh Jindal. Mohneesh had great command in hosting the event and extending an Inishowen welcome to Beyond Light Therapy guests. He highlighted the standard of work from Nathan Hegarty and his father Paddy and all the craftsmen who showed up to bring Beyond Light Therapy into a class of its own, “Beyond Light Therapy Class”. Professional craftsmanship has brought the vision of Mohneesh and Josephine to life in Beyond Light Therapy.

Ticket holders were treated to a free two-hour session in the EESystem Technology in Lisfannon over the extended weekend. Many of these same people availed of the “Offer of the Day” to celebrate the first event since Beyond Light Therapy officially opened in Lisfannon. Attendees enjoyed a hot lunch in the Inishowen Gateway and the playing of the harp by the lovely Joeleen McLaughlin of the Henry Sisters, native of Inishowen.

Five lucky ticket holders left the conference with an overnight stay in Beyond Light Therapy. The recording of the presentations will be on sale shortly via the website for all to understand once more, in the comfort of their home, exactly what this technology is about and how it benefits humankind.

Moving forward, Beyond Light Therapy will have gift vouchers available for sale on their premises for all occasions, having the ability to pay health forward in times where energy enhancement is needed.

They are also very excited to share they have been selected to be part of a documentary based entirely on their journey as they plan to expand their services further into Inishowen and an adventure in becoming the first in the world dedicated to the restorative health of the animal kingdom.
