ADVERTORIAL

Beyond Light Therapy in the Heart of Inishowen

CONFERENCE IN INISHOWEN GATEWAY HOTEL TO SHOWCASE GROUND-BREAKING HEALING THERAPY AT LISFANNON

BEYOND LIGHT Therapy, which opened in Lisfannon earlier this year, has in a few short months garnered quite a reputation, with a constant flow of people passing through its doors to witness for themselves the peaceful sanctuary created solely to secure the first and only 48-unit Energy Enhancement System (EESystem) technology, outside of the USA in the world.

Owners Mohneesh Jindal and local-woman Josephine Fullerton decided last year they would partner in bringing this ground-breaking technology to Buncrana. And that they *would* make a difference. Understanding that the genius body is fully capable of regeneration, especially raising our vibration and synchronising our cellular energy to a healthy repairing environment, the duo opened their premises at Lisfannon earlier this summer.

On September 22nd next, Beyond Light Therapy host a conference in the Inishowen Gateway Hotel to showcase the transformative power of the Energy Enhancement System. Billed as 'The Greatest Show On Earth – The Healer's Conference', the event features a number of top speakers and will also afford Mohneesh and Josephine the opportunity to share some of the amazing stories of their journey to date.

What is the Energy Enhancement System?

THE ENERGY Enhancement System™ (EESystem™) generates multiple bio-active life-enhancing energy fields, including "scalar waves" which can allow cell regeneration, improve immune function, provide relief from pain, detoxify the body, elevate moods, and assist in balancing right and left hemispheres of the brain to increase energy levels.

This stunning technology in Lisfannon – developed over 20 years by Dr Sandra Rose Michael, PhD, DNM, DCSJl – uses custom-installed computers to generate morphogenic energy fields that can promote healing.

Dr. Sandra Rose Michael is a trailblazer in integrative medicine and biophysics. Her revolutionary work in BioPhotonics and Scalar wave technology aims to transform the medical field by replacing traditional pharmacological methods with electromagnetic healing (Dr. Sandra Rose Michael is one of the speakers at the conference in the Inishowen Gateway).

The EESystem has been recognized as a profound energy therapy at dozens of medical, scientific and professional conferences worldwide. Promoting wellness, healing, relaxation, purification and rejuvenation. This ecologically and environmentally-safe system is used by individuals, doctors, and therapists as well as Meditation and Wellness Centres to improve human development and psychological well-being.

The Energy Enhancement System combines mind, body, spirit and science to help you achieve peak performance and reach higher states of health, consciousness and self-actualization. The future is here.

The human body has crystalline structures in every cell wall that can hold a charge. When the human body enters a Scalar field the electro-magnetic field of the individual becomes excited. EESystem uses Scalar technology to return the body to a more original and appropriate electrical matrix.

The EESystem has been clinically studied by multiple third party individuals. These studies have provided evidence of the potential of bio-scalar energy to boost human cell regeneration, immune functions, and neurotransmitter functions. It can help eliminate and nullify the effects of disruptive frequencies in the body while optimizing cellular energy levels to 70-90 millivolts.

This means that EESystem can significantly increase your energy, mental clarity, enhanced health, and overall well-being. The EESystem Technology can help you achieve your maximum potential by recharging your energy.

Why Lisfannon?

IT WAS an almost immediate decision, say Mohneesh and Josephine, to put the foundation of their business in Buncrana after both realized the potential of Beyond Light Therapy for the people and know it creates generational healing for families. Making it a no-brainer.

Mohneesh and Josephine have decided, after a few short months, to showcase a few amazing testimonials at an upcoming event in the Inishowen Gateway Hotel on September 22nd next. Called 'The Greatest Show on Earth – The Healer's Conference'. Where anything and everything improves. Speaking with Mohneesh and Josephine at their premises in Lisfannon, they explain their excitement about the line-up of speakers who are taking to the stage to talk about human potential.

Joining them on this very special journey is Josephine's sister, Sadie Grant. Sadie has her own company called Effective Health Solutions, and practices Advanced Systematic Kinesiology. She is also a GAPS Practitioner, Gut Psychology/ Physiology Health as well as Certified in Nutrition, and BSc. Hon. Psychology.

Both sisters are local to the area and well-versed in the healing potential of ourselves, (our cells).

Mohneesh, who resides in Dublin, is a serial entrepreneur having a heart for people, seeing first-hand almost daily in his finance business how his clients' stress affects their ability to be in this world feeling safe and secure – regarding health especially.

Mohneesh is fully engaged and at the wheel of Beyond Light Therapy in Inishowen, and has fully researched the EESystem Technology – going to Israel and leaving no stone unturned – asking Josephine for her opinion on it, and the rest is history.

He will be the Fear An Ti for the 'The Greatest Show On Earth – The Healer's Conference' event in the Gateway Hotel on September 22nd next and is looking forward to sharing stories of the journey so far. ■

"Scalar energy is a form of inter-dimensional energy being generated, when a person sits in a room with the EESystem technology running, their entire life force improves."

Jack Schulman – Computer Scientist and Physicist, Rutgers University Graduate

"The Scalar Technology, Energy Enhancement System, ™ produces zero-point energy that is clinically proven to boost human cell regeneration, immune functions and neurotransmitter functions."

Research conducted at the Max Planck Institute of Germany
